# The Preface.

**I**T is not the Intendment of this Introductory Discourse, to perswade the World of the Usefulness, or rather the Necessity of such Gates of Language and Learning: The rational and convincing Prefaces of many learned men, the heavy progress of former times much wanting them, with the general acceptance of, and great improvement by these helps in later times, render such Labours useless. But the present Design is, to give a plain and brief account of Other Undertakings of this nature, especially by learned men of our own; and of what hath been endeavoured in this Present Work; and in both to give the Reader that Satisfaction he certainly will and justly may expect as to this Book offered to view.

To Languages as well as Dominions (with all other things under the Sun) there is an appointed time: they have had their Infancy, Foundations and Beginning; their Growth and Increase in purity and perfection, as also in spreading and propagation; their state of consistency; and their old age, declinings and decays. That thus is pleased the Divine Providence to deal with Rome in her Power and Tongue is abundantly manifest: For after that she that had been the Mistress and Glory of the World, grew ripe for the recompence of her Pride, Tyranny, Persecutions and all Abominations, the Barbarians (for Language and Manners) over-ran her and her Territories, and seven times in much less then an hundred years trampled upon her Glory. From these times, and peculiarly the Goths establishment, towards the end of the Fifth Century, the genuine purity of the Latin Tongue was sensibly imbas'd, and indeed as to a general acceptance, all real Learning (and Religion very much) ran low and dreggy. Onely, as God reserved in successive Ages of degeneracy and darkness some Witnesses to his Truth; so were there some worthy men now and then appearing for the Vindication of Learning, and those Tongues that did most befriend her. One of the first most direct and considerable attempts of this kind (as to the Latine Tongue) was made by Papias a Lombard, whose Work, though wanting the best Method for use, viz. Alphabetical Order, and not wanting some Oversight and Impertinencies, yet was a good Essay for those times towards the Derivation and Explication of Latine Words: this was towards the end of the Twelfth Century, when as for a considerable time before and after, the Latine Tongue had scarce any Writers worthy notice, onely some few (and those but ordinary) Historians, and some School-men (with their Niceties wrapped up in Improper Language) appeared in the World, and indeed not many Learned men among the Grecians, onely in the Hebrew and Arabian Tongues Learning flourished. A considerable time after this Vocabulist (for so is he nam'd.) Nestor Dionysius of Novara in the Dutchy of Millan succeeded, and what Papias his Vocabulary, and some other Works of like nature (some having, some wanting the Names of their Authors) had heaped up, and in some things had mistaken, or were themselves by their too ignorant Successors mistaken, he with considerable Amendments and Improvements reduced into Order by an Alphabetical handling: and this not without the Envy and Exclamations of his Contemporaries, who so far were strangers to good Latine, so

## THE PREFACE.

little were sensible of its Depravations among them, and so much loved their Barbarisms, that they hated, derided and opposed whatever offered at the redeeming of Learning from its present slavery. After him many industrious and able Restorers of Learning followed apace, and about the year 1494, Ambrosius Calepinus treading in his steps and method: But that Work of his at its first Birth bare no proportion to its present stature, to which it hath gradually increased at many Editions in several Places, by the Labours of Montanus, Passeratius and other excellent Builders upon his Foundation. Not to enlarge too far, take but two more: Robert Stephens, that Learned Printer, about the year 1536. put forth his Thesaurus, a Book of great Industry and Worth: of which Cooper saith, *The greatness is the only inconvenience of that Golden Work.* And not long after, Joannes Frisius published his Latine and German Dictionary. To come to our own Writers of Dictionaries: About the same time Sir Th. Eliot, an able Lawyer, and every way a famous Scholar in those days, first brake the Ice as to our English Tongue, with great pains Compiling a Latine and English Dictionary, called his Bibliotheca, in the Reign of King Henry the Eighth, to whom it is Dedicated. This Work Thomas Cooper, in the beginning of the Reign of King Edward the Sixth, Augmented and Enriched with Three and thirty thousand Words and Phrases, besides a fuller account of the true Signification of Words; farther declaring, That there was a Complaint of innumerable Faults in Eliot, by too strict following Calepine, the mistakes of Impressions, or his own hast and oversight. Afterward the Reverend and Learned Cooper, Bishop of Lincoln, reserving still as a Foundation Eliot's and his own former Labours upon him, and making great use of Stephen's Thesaurus and Frisius his Dictionary (inasmuch that F. Holyoak saith, he Translated Frisius his German into English) put forth his Thesaurus linguæ Romanæ & Britannicæ, about the year 1565. About these times Baret's Alvearium, being an English and Latine Dictionary, was Prepared, and Printed 1573. In the year 1583, Richard Hutton makes the French-part of Guil. Morelius (that Learned Printer to the French King) his Comentarii, to speak English. To come nearer our Present Work: In the year 1588, Tho. Thomasius, the Printer to the University of Cambridge, puts forth his Dictionary in Octavo, which was so acceptable a Work, that in eight years it had Five Impressions with the Authors Corrections and Enlargements, in the carrying on of which Work he died. John Legate undertaketh, with his Place, the Printing of his Work 1596; in which Fifth Edition many Words were added out of Physicians, Lawyers, Mathematicians, &c. Also Examples and Instances out of best Authors, and a Dictionary of Names of Places and Persons added thereto. Since this time it hath risen to Fourteen Editions, not without signall Improvement, especially by Doctour Philemon Holland, of which Fr. Holyoak freely and ingenuously acknowledgeth, That by that Learned person in Physick and Philology it was so wonderfully Inriched, that there was no Dictionary of that kind Extant, that for Number of Words, perfect Interpretation, and choice Phrases may be compared with it. John Rider, Minister of Saint M. Magdalen Bermondsey in Southwark, and afterward Bishop of Killaloe in Ireland, (not long after Tho. Thomasius) published his work, as an Epitomizer of all the Learnedst and best Dictionaries then in English, superadding much of his own to what was then Extant: That Part whereof which hath the Latine before the English was swallowed up by Francis Holyoak's greater attempt and performance: Which Work of Holyoak's, however designed (as he Prefaceth) before Becmannus, Fungerus and Martinius came out, yet is not a little beholdling to them, especially the last, as may appear to any one that shall Compare them in some few Words. Very lately an

ingenueus

## THE PREFACE.

ingenious person, Christopher Wase, hath published a more contracted Dictionary, a compend of Calepine, a Book of good use.

Having thus led the Reader with the series of time through the most considerable Works of this Nature, now let him take this account of the Book before him. As to the adding this Dictionary after others that have been well reputed and are useful, let it be considered, That they were written one after another, and that was no hinderance to their Authours pains or others acceptance: yea others of late in other Countries have been and are still adding new to the old: and who can fix the time when such Works are at the height of all desirable or possible Perfection, where Hercules's Pillars may be placed with a Ne plus ultra? Nay, it will appear by what followeth, that even the later Dictionaries have been defective: Moreover they, as hath been represented, had their Amendments and Increase by successive Endeavours and Editions, raising them to that pitch wherein they stand. As to what hath been endeavoured, and (we doubt not) in good measure performed in this Edition, We will speak to the several parts of the Book distinctly.

As to that Part which hath the *English* before the *Latin*;

The *English* it self is very much restored where faulty and mis-spelled in former Dictionaries: And in the *Latin* of them many faults corrected.

The leading Words are put generally into their natural Order and due place, whereas before they were much transposed.

Many Heads of *English* with their *Latin* supplied: And very many Additional *Latin* Words Inserted in their places under the former *English*; both, by a modest computation, amounting to at least Ten Thousand. And this not without furtherance by a Folio Manuscript, which seemeth to be of good Antiquity and Precedent to Rider. So that there is a considerable Accession, as may appear to the Peruser.

As to that Part which hath the *Latin* before the *English*;

Multitudes of Faults amended in the Words, both *Latin*, *Greek*, *Hebrew* and *English*.

The Sense which was sometimes unintelligible, and sometimes lame and defective, is now made Entire and Plain, so far as brevity would permit.

The joining with good Coherence of several Designs in other Dictionaries, in one Volume in This, is considerable. Formerly the Pure and Proper *Latin* Words were in one Alphabet; the Obsolete, Antique and Antiquated Words in another, to the trouble of Him that searched for a Word. And if it be inquired, why those Words that are of a baser Allay are not by some Mark distinguished from the more currant and usual Words: Let it be considered; First, That it is hard to set the just Boundaries and Landmarks of the more approvable *Latin*, and that which by Degrees crept in with the declinings of the Empire, decay of Learning and mixture of Barbarous Nations. Secondly, That this part of a Dictionary is little consulted, but for the understanding of a Word found in an Author, and doth not considerably belong to the making of *Latin*. Besides, that the Nature of the Authors quoted generally intimateth when a Word is suspicious for purity, and when not. Moreover, formerly the Etymologies and Notations of the Word were chiefly minded by some; the Instances of Use, and Phrases in Authors most attended by others: This hath the former (and supplies that defect in Thomas) for the understanding of the whole Frame of the *Latin* Tongue, and its Derivations. This hath also the Later (therein supplying that great Defect in Rider and Holyoak;) Phrases being a Clavis to Authors, letting us in to their Sense and Meaning.

## THE PREFACE.

*Meaning, as also a Guide to the Genuine and Proper use of the Tongue. Besides, that the English is very large in shewing the Signification of the Words, and supplies the absence of some Phrases, which to have put in, would have swoln the BOOK beyond bounds.*

*A considerable number of Words, never before in Thomas nor Holyoak, are added.*

*Many Pertinent and Excellent Philological Observations, Etymologies and Criticisms, together with Enlargements in Phrases and English inserted.*

*Order exceedingly restored to the leading Words which were very un-Alphabetical before; as also to the Matter under them, which was very confused, and sometimes the Remarks or Instances belonging to one Word were set under another. And this strictness of Alphabetical Order observed, without prejudice to the meanest Readers understanding of the Primitive Word, for it is named in handling the Derivative, and the Reader directed to it.*

*Whereas in the former Edition the Quantities of Syllables were frequently omitted, or very much mistaken; In This great care hath been used for the supplying of the one, and rectifying of the other. And for a farther help in due pronounciation of Words, and composing of Verses, the Quantities of the Proper Names are added in this, of which heretofore no notice was taken.*

*Authours Names added where wanting and needful; rectified where mistaken; and set to their Proper matter where misplaced.*

*Capital and Italick letters used, to make more conspicuous and more easily observable those words and things which are most considerable. A thing before not minded.*

*As to that Part which contains the Proper Names;*

*The Principal Words handled were often misrepresented, but now much rectified; together with the matter under them.*

*Very many wholly new Added: As also some considerable things Adjoyned to the Old Heads; together with many modern Names of Places. And this by consulting Ortelius his Thesaurus Geographicus, and the last and best, i. e. the London Edition of Ferrarius his Geographical Lexicon.*

*The Chronology often bettered. The Topography rendred more exact.*

*The History, and Genealogy of Persons much amended.*

*As to this and the Former Dictionary, the pointing regulated.*

*Besides, a Catalogue of the Names of Authours at large Collected, for the satisfaction of all, and benefit of those that could not well understand them by their initial Letters.*

*The other pieces Annexed have sundry Amendments: and one added, which no former Dictionaries contained, viz. The old Names, by which Places, belonging to this Realm, were represented and known.*

*As to the whole, the Peruser may find*

*Innumerable Emendations: some of which may (without a breach upon modesty) be thought to have been the oversights and mistakes of the Writers, however happily Industrious in most things: and others Proceeding from a not sufficiently careful Printing of Books whose Fame did challenge Credit and Esteem: the last Editions of these Books, as Aristotle saith of new Models of Government, having the Errors of the former beside their own; the faults of the first, as Physicians write of the Concoctions, being seldom or never corrected in the following.*

*Great Enlargements: Which the length and largeness of the Page abundantly demonstrateth: so that this may be judged to contain more matter (beside many thousands of Amendments) by a third or fourth part then the last Editions either of Thomas or Rider,*

## THE PREFACE.

der, especially considering many superfluities cut off, repetitions prevented, and the Words and Matter closely conched and contracted, as far as might be without prejudice to a full understanding of the Sense.

In Sum; Nothing considerable, nothing desiræable, nothing profitable in Thomasius, Rider or Holyoak (yea few such things, that are found in other Dictionaries, and could be comprised in such a Volume) can be said to be wanting: And if therefore there be retained some Etymologies which may seem not so Proper, and so many that may seem not so Needful, the Reader then cannot complain of Defect, but may take his choice, and receive some satisfaction from seeing what was accounted Learning in former Ages.

And all this performed,

By consulting the Authors mentioned generally both Ancient, Modern and Latest, especially where any thing might rationally appear doubtful or defective: for had we not taken this course, many Places and Passages had been obscure and imperfect still.

By comparing former and truer, at least various Editions of Dictionaries in present Use, yea Later and Improved Editions of Writers made use of by other Compilers of Dictionaries: and indeed, that we may make honourable mention of a Benefactor, much is added (though not alway with the Authors name) out of that Excellent posthumous Work of the admirably Learned Gerardus Joannes Voilius, his Etymologicon linguæ Latinæ.

By probable and rational Conjectures, submitted to the judgement of the Reader. And Lastly, By palpableness of many mistakes, and apparent plainness of the ways of amendment.

As to all which, there were great pains and long time bestowed on, and more hands than one Impleyed in the Work.

Having thus endeavoured the satisfaction of the Reader, We shall only mind him of two or three things more.

Some words (and possibly sometimes things) are taken upon the credit of former Authors of like Works to this, as not unlikely they had but a traditional knowledge of them neither: and probably at the best found in some ancient and defective Books, whose Authors names were not Annexed, or not thought Worthy of a mention, or are now Lost. These Words We impose not, no more then omit: Yet endeavours have not been wanting to find out the Head of any such Nilus, and the Parents of such expositious foundlings.

We are not guilty of so much vanity as to pretend this Work Perfect, either in the Whole, as if nothing could be added; or in its Parts, as if nothing might be altered: Nor can any humane Work lay claim to this Priviledge, much less Dictionaries in which are so great Varieties and Intricacies, and, as to many things contained, dissents of able Criticks.

Yet must We profess a confidence, that this Work will bear us out in declaring, That for Matter contained, and Manner of Performance, it comes not behind, but for Copiousness and Accuracy, and consequently for Usefulness, exceeds what ever hath been undertaken for the English use.

This we thought best to speak in English, for they to whom this Book can prove generally Useful, must understand that Tongue; but many, to whom the satisfaction of a Preface would be acceptable, cannot understand Latin.

A fur-

## A further Advertisement to the READER about the Addition of the Hebrew, in this EDITION.

**B**Ecause, the Hebrew, hitherto, hath been generally deficient; or, superficially, and with little Care and Accuracy Inserted; both in those other Lexicons and Dictionaries, before mentioned in the Preface, and in the former Editions of this; therefore special Care was taken, to make choise of, and add, in their most Proper and convenient Places, the most Textual, Usual, and Proper Hebrew-roots, and Derivatives, both after the Simple or Primitive Themes, and the Compounds of the Latin, throughout the whole Work: As likewise, because, the right reading of the Hebrew Words, without the Points or Vowels, is somewhat difficult, and not much Practised; and the smallness of the Character could not conveniently bear the Points; therefore to facilitate the Use and Practise of Readers onely initiated, and not thoroughly exercised in the Hebrew Studies; the reading of the most difficult ambiguous Hebrew Words, doth follow them, in known Vulgar or Latin Characters; and that most frequently, where the Hebrew-roots, and Derivatives, have the same Letters or Consonants; and differ onely by the Points or Vowels, for their pronunciation in reading; If the Pains taken herein do prove Useful and Acceptable, there is intended and preparing a Compendious Latin Hebrew Lexicon, With the Latin Words alone, before the Hebrew Primitives and Derivatives, in their Various Conjugations, and Significations; &c.
